

Multiview Technology — Information Withholding Report (Resolution Update)

Report ID: IW■2025■002-R

Classification: Archival Access Resolution

Date: October 5 2025

Filed By: Shawn Wiederhoeft

Department: Multiview Technology / CTC Archive Division

Summary

The archival irregularity concerning the original Multiview Technology Cinnamon Toast Crunch specimen **A■01** has been resolved. Although the original digital files remain unretrieved, **Curt (C-U-R-T)** has shared complete screenshots of the lost documents, ensuring that all substantive design and content information from the prototype layout is now preserved in the Multiview archive. This event closes the outstanding “Information Withholding” case, restoring continuity within the Cinnamon Toast Crunch Grading Archive and confirming the availability of all reference material required to maintain lineage accuracy between prototype and current report formats.

Resolution Details

External Party: Curt (C-U-R-T)

Status: Shared screenshots of the missing **A■01** prototype layout and related documents.

Verification: Visual content confirms full equivalence with the original four-page Multiview prototype report.

Action Taken:

- Screenshots entered into the archive under supplemental ID **A■01-SRC-CURT**.
- Case IW■2025■002 marked **RESOLVED** as of October 5 2025.
- All dependent documentation (Grading Standards v1_4, Official Report Format v1_2, etc.) now fully reconciled with recovered reference material.

Archival Implications

- The **A■01 specimen** remains classified as a **Legacy Format Specimen**, but its layout and textual data are now considered **recovered**.
- No additional recovery actions are required unless higher-resolution originals surface.
- This resolution confirms the **conceptual and procedural continuity** of the Multiview grading lineage from **A■01 → A■02 → present frameworks (v1_4 Strict+)**.
- IW■2025■002 is to be retained as a closed file within the **Archival Irregularities Ledger** for transparency and historical reference.

Conclusion

The withholding incident that once symbolized absence now becomes a document of restoration. Through Curt's cooperation, the missing prototype's spirit has been re-entered into the record — proof that even delayed collaboration can complete the bureaucratic circuit of Multiview Technology.

Case Status: ■ RESOLVED
