## OFFICIAL CINNAMON TOAST CRUNCH GRADING REPORT

*"Why not take the most ordinary thing and bury it in paperwork until it feels important?"*

### Specimen Identification

Specimen ID: A-40

Certification ID:

Classification: VO

Framework: Multiview Grading Standards v1.6

Date: 10/13/2025

Time: 4:16:30 PM

Certified By: Shawn Wiederhoeft

### Measurements & Weight

Length x Width x Thickness: not recorded mm

Weight: not recorded g

### Condition Summary

The specimen exhibits a significant curvature of approximately 10%, which exceeds the ideal range of 2-5% and results in a penalty. The geometry is affected by this warp, leading to a lower subgrade. Corners show moderate wear but maintain a reasonable shape. The coating is fairly consistent, with a good distribution of cinnamon and sugar. The surface texture is slightly uneven, with minor defects visible. Edge alignment is generally acceptable, though not perfect. Overall, the piece is in good condition but limited by its curvature.

# Subgrade Analysis

## Weighted Subgrades (0–10)

Corners: 8 (Weight: 0.20)  
Edges: 8 (Weight: 0.18)  
Surface Integrity: 8 (Weight: 0.20)  
Coating Uniformity: 8.5 (Weight: 0.12)  
Geometry / Flatness: 7.5 (Weight: 0.30)

## Curvature & Penalty Data

Curvature: 5.25 %  
Penalty Triggered: None  
AI Confidence: 94.5%

## Final Computation

Weighted Mean: 7.91  
Strict-Mode Adjustments: None  
Rounded Grade: PSA PSA 8.0 (Good)

## Analytical Notes

The specimen exhibits a significant curvature of approximately 10%, which exceeds the ideal range of 2-5% and results in a penalty. The geometry is affected by this warp, leading to a lower subgrade. Corners show moderate wear but maintain a reasonable shape. The coating is fairly consistent, with a good distribution of cinnamon and sugar. The surface texture is slightly uneven, with minor defects visible. Edge alignment is generally acceptable, though not perfect. Overall, the piece is in good condition but limited by its curvature.

# Provenance & Interpretation

## Provenance

## Personal / Observational Note

## Interpretation

This specimen was evaluated under Multiview Grading Standards v1.6, applying full strict-mode enforcement and curvature cap logic. Any subgrade < 8.0 or curvature > 7.5 % automatically invoked the grade cap of "d 8.0. Rounding applied deterministically downward.

# Appendix — Understanding the Report

## How to Read This Report

- Subgrades (0–10): Corners = edge integrity, Edges = cracks/uniformity, Surface = ridge clarity, Coating = granule balance, Geometry = flatness + aspect ratio.
- Measurements: Recorded in mm/g using calipers and digital scale.
- Curvature:  $\text{Max height deviation} \div \text{half-span} \times 100 \%$ .
- PSA Scale: 10 = Gem Mint !' 1 = Poor (broken or burned).
- Strict-Mode: Any uncertainty reduces grade; never rounds up.

## About Multiview Technology

Multiview Technology is a conceptual grading authority that applies forensic-level analysis to disposable breakfast objects. Each specimen passes through an AI-assisted vision pipeline measuring geometry, curvature, color variance, and ridge frequency. Results are deterministic, weighted, and rounded conservatively to enforce discipline in absurdity.

*The paperwork is real. The subject is breakfast.*

## Archival Policy

Every document—complete or erroneous—is permanently preserved for provenance continuity. Error or incomplete grades are recorded with the same status as valid reports.

## System Hash & Provenance Record

Multiview Digital Integrity Hash (SHA-256): 2cd610b6...73fa0bcd

(Full hash stored in archive metadata)
